P23301 Instructions Pyramid Hunter booth M 1:12

Tools: handicraft pad, tweezers, glue
Optional: daylight lamp, glasses, magnifying glass

Danger:

Not suitable for children under 3 years. Small parts that can be swallowed!
Please read the instructions completely before crafting.

The order of the work is to be planned in such a way that the parts are allowed to dry between the assembly steps.

Mount a small disc under the base plate in the middle with a little glue as an axle bearing.

Large turntable: Between 6 tree elements, a small disc with 6 slots is mounted in the slots of the tree parts. The trees are mounted below in small slots in the turntable.

Position the turntable with figures, especially the larger animals, on the inside of the tree so that later all figures can rotate within the stand.

Assemble the raised stand: Glue 4 walls to the raised stand floor and add 4 supports from below.

Slide the small disc (seat) and small turntable onto the needle. Push the needle from above through the stand that is still open at the top and push on and align the larger turntable with tree from below.

Only now is the stand mounted on the base plate in 4 slots. 4 slotted discs are mounted under the base plate. Fix all turntables to the axle with some glue. Mount the figures standing upright on the turntable so that they can rotate freely. Glue on 2 roof elements. Glue 4 fences into slots on the ground and add candles behind them.

Slightly twist the blades of the impeller. Put the impeller on the eye of the needle and stabilize it with the 5. plug socket to be glued on. Finally, mount more figures on the fence on the base plate. Glue a ladder on the outside.

Take a look at www.va-holzkunst.de, the address for new fretwork templates, handcrafted fretwork (Erzgebirge) and miniatures 1:12 to 1:4000 scale.
